I am writing in regard to the Low Power FM Radio that is currently being entertained by the FCC

As a small business owner, I feel there is a great need for more community based communication. Low Power FM Radio will provide that. Much like Cable Access has done wonders for the community, Low Power Radio will do the same in that many people across Colorado who would never have had a chance to broadcast will be able to do so.

If you have listened to the FM stations in Denver recently, you will know that the quality and variety of radio programming is extremely lacking. Low Power FM Radio will make the airwaves creative, diverse and allow your constituents to have a voice again.

I never get involved with anything like this, but I believe it is such a good idea, I felt I needed to say something. Please consider this as a very good thing for the community.

Thanks

John Reidy
